At Home Grooming Maintenance

Basic Grooming Guide

At Home Grooming Maintenance

All dogs need regular grooming to keep their coats in tip-top condition. Grooming removes dead and loose hair – leaving dogs feeling cleaner, happier and every hair brushed out is one less you have to vacuum!

Four steps to a well groomed dog at home

Washing

It is important to wash your dog regularly using products specifically for dogs which is pH balanced for their skin. Human shampoo and conditioners have a higher pH level which may irritate your dogs skin.

Brushing/Combing

Regular brushing is good for your dogs coat. It removes loose hair, knots and debris from your dogs coat prevents uncomfortable matting while encouraging new hair growth and distributing naturally occurring oils through their coat.

Nails

Hate it when your dogs claws have overgrown? Why not try the Shear Magic Nail Grinder, ideal for trimming, shaping and smoothing nails. Great for soft nails, tidying up edges. Great for all size dogs.

Trimming

We recommended trimming of certain areas – trimming the face to allow for good vision, trimming around ear areas. Hygienic areas such as genital and anal to prevent infections.
